TowBox® V3

A new leisure concept

Our new TowBox V3 is an innovative product, in keeping with the aesthetics of 21st century vehicles and even more practical and easier to use than previous versions. Customers can now choose the color that best matches their car. The product not only offers better performance, but has passed the tests of the City Crash Test, which guarantees your safety at the wheel. Our TowBox V3 has built-in Full Led pilots, a product for which we have applied for a European patent since they are compatible with any type of electrical kit, they have light function with row of progressive LEDs and they are compatible with fault detection lamps and Control C2.

TowBox® V3

Advantages:

Wide opening for easy loading

New frame with reclining system

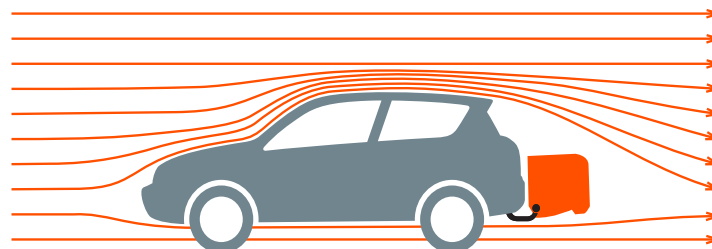

Full LED lights with progressive indicators

Built-in wheels for easy mobility when not on the vehicle

Central Locking system

With hydraulic pedal to fold easily

TowBox V3 can increase your vehicle's load with style.

As it is fitted to the rear, it does not affect aerodynamics, therefore allowing you to save fuel and drive without noise.

Universal lights

Universal Full LED rear light cluster
